

Certeon to Present Webinar on Accelerating Applications for Hyper-V Virtualized Environments at Hyper-V Unleashed

- WHO:** Jane Shurtleff, Marketing Director, Certeon, and Vipul Shah, Senior Product Manager, Virtualization Marketing, Microsoft
- WHAT:** Webinar on Increasing Application Access, Scalability and Performance within Hyper-V Environments over the WAN
- WHEN:** Tuesday, July 21, 2009 at 1:30 p.m. ET/10:30 a.m. PT
- WHERE:** Register online at http://www.certeon.com/Hyper-V_Webinar/index.asp?s=Certeon

BURLINGTON, Mass. – July 14, 2009 – [Certeon](#), a Microsoft certified partner, today announced that it will host a Webinar on accelerating applications for Hyper-V virtualized environments over the WAN (Wide Area Network) as part of the upcoming Microsoft Hyper-V Unleashed virtual event. Hyper-V Unleashed is a free, interactive, online event taking place on Tuesday, July 21 from 11:00 a.m. – 5:00 p.m. ET.

During the event, Certeon and independent virtualization experts will discuss how to deploy efficient, scalable, and high performance Hyper-V virtualized environments—whether an organization has already deployed a virtualization solution or is just getting started. Certeon will be sponsoring the online event and presenting how its aCelera Virtual Appliance software dramatically increases scalability and performance when accessing applications within Hyper-V environments over the WAN.

As part of the 1:30 p.m. ET Webinar, Certeon’s Jane Shurtleff , and Microsoft’s Vipul Shah will explain how to deploy scalable, high performance Hyper-V infrastructures for delivering applications to remote users. Certeon will also demonstrate how organizations can effectively decrease application response time to remote workers by more than 95% and save 60% on IT capital and operations costs.

In addition, attendees can learn from independent virtualization experts Michael Otey, Michael Campbell, and John Savill about how to set up Hyper-V; how best to manage Hyper-V; how to set up Failover Clustering for Hyper-V; and much more.

Who Should Attend:

IT Professionals who want to learn about virtualization and Hyper-V, including:

- managers and directors
- IT specialists and generalists
- systems and network administrators
- developers

The Hyper-V Unleashed event is presented in an interactive, real-life simulation. Attendees will experience a lifelike visual environment, networking and interactive tools, staffed sponsor booths, and educational chats to complement each conference session. To find out more about attending Hyper-V Unleashed, visit the registration page [here](#).

About Certeon

Certeon's *aCeler*a software is the first and only application acceleration virtual appliance to deliver acceleration, virtualization, and manageability when remotely accessing applications throughout a distributed enterprise. *aCeler*a software reduces application response time over the WAN by more than 95 percent without proprietary hardware appliances. *aCeler*a is optimized for mission-critical applications such as: application virtualization and management, software configuration management, enterprise content management, Web-based collaboration, and wide area file services. *aCeler*a is flexible and easy to deploy, delivering faster, more scalable application acceleration to more users. Certeon enables distributed enterprises to dramatically reduce their TCO and gain a faster ROI when compared to proprietary hardware appliances. Founded in 2003, Certeon is a private company, headquartered in Burlington, Mass. For more information, visit www.certeon.com or call 781-425-5200.
