Certeon and CorasWorks Collaborate to Optimize Enterprise Business Workflow

-- CorasWorks Workplace Suite and Certeon S-Series Application Acceleration Appliances Will Reduce Workflow Application Response Times by 1000 Percent --

BURLINGTON, Mass. – September 26, 2006 – Certeon, the first vendor to provide secure application acceleration from desktop to the data center, today announced that CorasWorks® Corporation has joined the Certeon Partner Acceleration Program as a complementary technology partner. Deploying the CorasWorks Workplace Suite™ with Certeon's S-Series™ Application Acceleration Appliances results in businesses delivering a high level of information availability to Microsoft® SharePoint®-based applications, with improved application response times of 1000 percent.

The CorasWorks Workplace Suite enables users to quickly and easily design, create, and deploy inter-connected business applications that run on top of SharePoint, without custom development—but with so many demands on the network, it's prudent for organizations to further optimize their SharePoint platform by accelerating its native performance. Certeon's complementary technology provides high performance and productivity for all SharePoint applications and knowledge workers, regardless of their location on a WAN.

"Enterprises today are eager to effectively support a dynamically changing network environment which is challenged by an increasing number of users, applications, and businesses processes, across multiple locations," said William Rogers, president and CEO, CorasWorks. "In looking for ways to optimize their CorasWorks software investment and ensure its value is available to all current and future users, Certeon's SharePoint Application Acceleration Blueprint™ stands out as the ideal solution to speed network performance today and as their networks grow."

The joint solution enables increased productivity for branch office workers by improving application response times by 1000 percent. It also provides support for more users and more

applications over existing bandwidth, reduces network utilization, and enhances the overall SharePoint user experience.

“CorasWorks’ ready-built solutions and modular components can be snapped together to drive business processes and offer custom benefits with out-of-the-box simplicity,” said John Lloyd, vice president, business development at Certeon. “Together, CorasWorks and Certeon deliver a compelling solution to optimize business processes and speed collaboration across the enterprise.”

About CorasWorks

CorasWorks Corporation is the leading provider of workplace application software on the Microsoft SharePoint collaboration platform and a Microsoft Gold Certified Partner. CorasWorks is the fastest, easiest, and most cost-effective way to design, build, and manage applications on SharePoint. The CorasWorks Workplace Suite is being used by more than 500,000 users, in more than 700 enterprise, corporate, non-profit, and government organizations in more than 20 countries around the world to build powerful and flexible integrated business workplaces, without custom development. For more information about CorasWorks, visit www.corasworks.net.

About Certeon

Certeon’s S-Series Application Acceleration Appliances provide the industry’s first solution for Application Intelligent Networking to deliver application acceleration, security, and scalability from the desktop to the data center. Based on Certeon’s patent-pending Secure Acceleration Technology™, the Company’s S-Series appliances minimize network traffic to significantly improve application response times, while maintaining end-to-end security. Founded in 2003, Certeon is a private company funded by Globespan Capital Partners and Sigma Partners. The Company is headquartered in Burlington, Mass. For more information, visit www.certeon.com or call 781-425-5200.
