Certeon to Present at Five “SharePoint Meets ECM” Roadshow Seminars

-- Certeon to Discuss Strategies for Accelerating ECM Applications + SharePoint Across the WAN --

BURLINGTON, Mass. – October 1, 2007 – [Certeon](#), the industry’s only vendor to securely accelerate mission-critical applications over wide area networks (WANs), today announces that it will be presenting at five events during the “[SharePoint Meets ECM](#)” Roadshow. Certeon will present on Thursday, October 4, at the Marriott Toronto Downtown Eaton Centre in Toronto, ON, Canada to kick off its series of seminars.

The “SharePoint Meets ECM” seminars are aimed at targeting how to deploy both Microsoft® Office™ SharePoint® Server (MOSS 2007) and core enterprise content management (ECM) solutions within the same environment. Attendees will learn MOSS 2007 functionality versus traditional ECM functionality, system ownership and support, policies and procedures and cost control. [AIIM](#), the leading sponsor of the “SharePoint Meets ECM” solution seminars, is the international authority on ECM.

Certeon will also be participating at the following shows:

- October 9, 2007 – Boston, MA, Back Bay Event Center
- October 11, 2007 – New York, NY, Hotel Pennsylvania
- October 16, 2007 – Washington, DC, Capitol Hilton
- October 23, 2007 – Atlanta, GA, The Westin Peachtree Plaza

A complete schedule can be viewed here: <http://www.aiim.org/ecmseminar/>

Certeon will present at these five solution seminars focused on solving the inherent limitations of the WAN when deploying enterprise-wide SharePoint and ECM applications to meet business objectives. The limitations to be addressed include bandwidth, latency, packet loss and network

contention. Certeon is uniquely able to address this need as it recently unveiled its Application Acceleration Blueprint™ specifically designed for EMC Documentum Content Server and eRoom®—adding to its growing portfolio of Blueprints that already includes SharePoint and other leading enterprise applications. In addition, Certeon [recently received](#) the “Designed for EMC Documentum” accreditation, demonstrating that the Certeon’s S-Series Appliance has successfully met a comprehensive set of criteria for good design, development and implementation.

About Certeon

Certeon’s S-Series Application Acceleration Appliances provide the industry’s only solution with Application Intelligent Networking to deliver application acceleration, security and scalability from the desktop to the data center. Certeon’s patent-pending S-Series appliances accelerate all WAN traffic and are optimized for distributed content delivery and collaboration applications such as: enterprise content management, work flow and process management, Web portals and search. S-Series appliances are the only solution to securely accelerate encrypted traffic (SSL) with the same performance improvements as unencrypted traffic. The appliances minimize network traffic to significantly improve application response times, while maintaining end-to-end security. Founded in 2003, Certeon is a private company, headquartered in Burlington, Massachusetts with European offices in The Netherlands. For more information, visit www.certeon.com or call 781-425-5200.
